## Reception Homework Projects

### Autumn 1

#### Language and Literacy

After your walk look at your objects together, name them and talk about their features. Make a list of the things you have found together with your child.

#### Mathematics

Look at simple 2D shapes, learn their names and see how many you can spot in objects you can find in your house

#### Understanding the World

Go on a walk and collect as many different things that are natural eg different types of leaves, seeds (acorns, sycamore seeds and conkers), old nests that have been abandoned, evergreen plants and send some of them in for a nature table in class.

#### Art and Design

Using things you have found on your nature walk make a bug hotel and send it into school so we can put them in our outdoor environment.

#### Technology

Using the internet can you research what the word 'hibernation' means. Then can you find out and write about one animal that hibernates in the Autumn.

#### Physical Development

Learn to put your coat on by yourself as it is getting very cold and you need to keep wrapped up and warm.
